

DATRON G-LINE High-Feed End Mill

With the new DATRON G-LINE dental end mill spectrum, we expand our portfolio with high-performance dental milling cutters featuring the latest technology parameters. DATRON G-LINE dental end mills excel at their low-wear DATRON special coating in the production of all indications where time savings and high quality are in demand.

The new DATRON high feed dental end mill was especially developed for the high-speed cutting of cobalt-chrome and titanium. With its unrivaled 3-flute geometry in combination with the DATRON G-LINE dental coating, it is predestined for technical high performance in the lab.

You get high precision combined with higher feed rates, shorter machining times, minimal wear and low heat generation when milling hard alloys and materials.

Your advantages at a glance:

- Specially adapted 3-flute geometry
- High cutting performance
- High precision when machining CoCr and titanium
- Long tool life due to oxidation resistance and thermal stability

DATRON Dental Milling Tools

- For all standard dental milling machines and materials
- Top tool life and quality with excellent price-performance ratio
- Maximum surface quality of milled indications
- Wide range and 100% availability
- Manufacture of specialised and custom milling tools
- All milling tools available separately
- Staggered rebates for single-product orders
- 4% discount for direct debit authorisation
Please contact rechnungswesen@datron.de if you have any questions about a direct debit authorisation
- Delivery anywhere in Germany on work days generally with the next 24 hours without surcharge for order received by 2:00 pm
- Worldwide distribution network
