

DATRON LIVE

Convenient. Efficient. Smart.

DATRON Live ensures that you always have an overview of the operating status of your DATRON milling machines!

- Program and remaining running time
- Real-time camera transmission of the production process
- Monitoring of compressed air, vacuum and coolant data
- Overview of the milling tools available in the magazine
- Information on the wear status of the milling tools

* Optional feature: available in combination with the DATRON next sister tool management option

ADVANTAGES THAT WILL EXCITE YOU:

- Call up machine data and camera image of your milling process in real-time at any time regardless of your location **
- Access via web browser from any device, such as smartphone, tablet or computer
- Free updates with DATRON next release notes
- Purchase a DATRON Live licence key just once – no runtime restrictions

** Requires the machine to be connected to a network. The device on which the app is installed must be on the same network as the machine.

COCKPIT

CAMERA

The DATRON Live Cockpit App keeps you in the loop – regardless of your current location. Check all the important operating parameters live on your smartphone.

Know at all times exactly what is being machined and how much of the program's run time is left.

You need to take a closer look at your work piece? Easy! The DATRON Live Camera App enables you to monitor the machining area during the milling process.
